

# Streamline Construction Administration with Document Workflows

Built specifically for the construction industry, Doc Express is a document management platform that allows agencies to advance, route, and sign contracts online. By pairing Doc Express with Appia for construction administration and inspection, agencies can easily keep stakeholders informed and move projects forward faster.

**Appia + Doc Express solve common problems found in offline or disparate systems:**

- + Contract documents can be routed and processed with preset, automatic workflows
- + Stakeholders can access real-time project data and document statuses
- + Clear audit trails in both systems make maintaining compliance easy
- + Digital and Electronic Signatures expedite change orders and certifications
- + Filter and search capabilities allow for easy document location and review

## Built for Teams to Thrive

### Owners

Informed and protected

### Inspectors

Empowered and productive

### Project Stakeholders

Always up-to-date

### Engineering Consultants

Efficient, accurate, in control

“Unlike other document management services, Doc Express is built specifically for our industry, so it has all the features we need to get our contracts finalized quickly. One of the biggest advantages is the configurable document workflow. Having all of our documents electronically stored and moving through a succinct workflow has been a boon to productivity.”

Wes Musgrove, P.E. Iowa DOT
