Appia®
for Construction Administration and Inspection
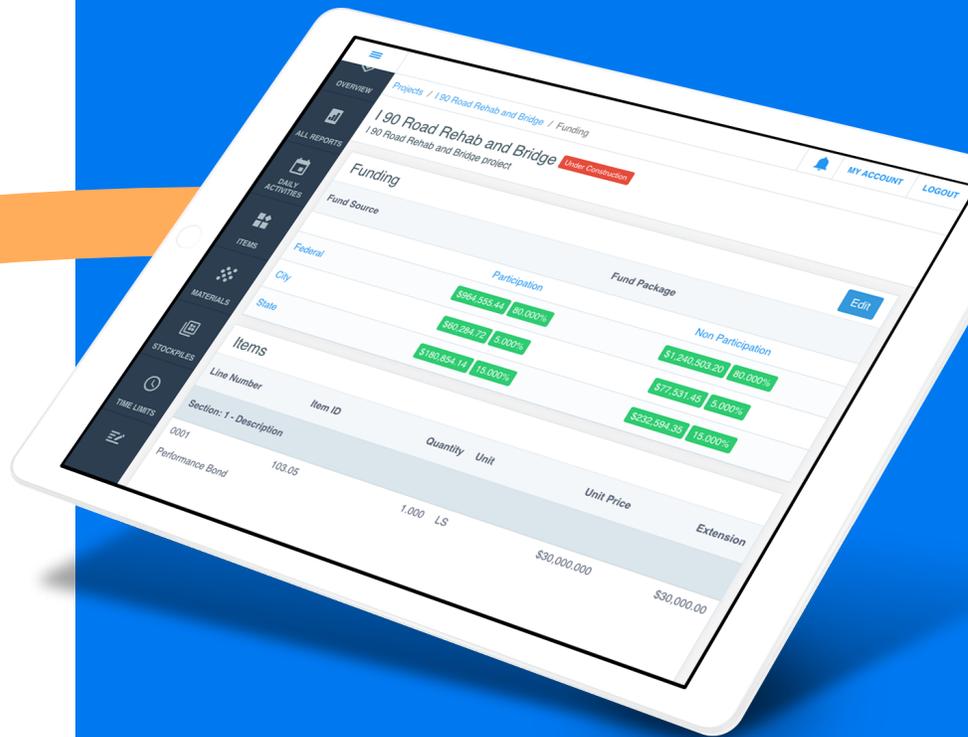

Municipalities and engineering firms nationwide use Appia to simplify construction contract management, create a collaborative environment for project stakeholders, and transform data into valuable information.

Streamline your processes with a web-based, mobile-accessible service built on intuitive use and flexibility.

+ For Workflow

Effortlessly maintain accurate project records in a standardized, easily accessible audit trail while eliminating data redundancy.

+ For Finance

Rapidly generate pay estimates with streamlined fund tracking and resolve disputes quickly with clear-record keeping.

+ For Personnel

Cut down on time and travel for supervisors, auditors and inspectors and simplify field inspection with easy-to-use mobile apps.

Key Benefits:

+ Allows for real-time project access and source data entry via a web-based, hosted environment

+ Daily Reporting including site conditions, prime and sub workforce, item postings and locations and attachments

+ Provides material tracking - including certifications and usage

+ Allows for multiple funding source administration and reporting

+ Provides an audit trail

+ Produces contractor estimates

+ Prepares built-in PDF reports, including item history to date

+ Scales to item-based projects of all sizes

+ Grants read-only access to clients and external stakeholders

+ Offline access via the Infotech Mobile Inspector® efficiency-booster app

> "Overall, Appia makes managing projects easier across teams, and has saved us — and by extension the client — many hours organizing and processing information through a paperless workflow."

JOE WARINO, PE, VICE PRESIDENT OF CONSTRUCTION MANAGEMENT
